YOUR name well distributed under the proper headings in the Classified Business Directory will find Prospects for you.

Prospects Make Customers

The Science of Advertising

is the analysis, study, and practical use of the different forms of display and reference advertising publicity.

Display Advertising

does not often produce the desire to buy at the time it is seen. It plants a seed of suggestion, but when the desire is realized it may be hard to find the ad which suggested it. Then one naturally refers to the Directory.

Reference Advertising

places wherever people may look for you or your goods, information that will point to you like a signboard.

Your Advertisement

in this book, properly indexed under all headings which describe your business (which is equivalent to repeating the advertisement under each heading) is the greatest value for the money it is possible to get, when the nature and life of the medium is considered.

A Live Wire

A representation of your business in the Special Classified Department of the Directory, with reference to it under the various classifications, will carry light to those seeking you.

Five Reasons for Directory Advertising

1.—Because the directory will bring the advertiser in touch with the entire population.

2.—Because directory advertising is recognized as the most effective and least expensive of any method of reaching all the people all the time.

3.—Because the directory is issued only once a year and your expenditure is based on advertising to cover the entire time.

4.—Because the directory circulates generally among all the people; although it may not be in use in the homes, yet every member of every home uses the directory in the nearest store or in the office or factory, almost daily.

5.—Because the directory is a credit and boost to a community because everybody is interested and represented in it.

The Science of Advertising

is the analysis, study, and practical use of the different forms of display and reference advertising publicity.

Display Advertising

does not often produce the desire to buy at the time it is seen. It plants a seed of suggestion, but when the desire is realized it may be hard to find the ad which suggested it. Then one naturally refers to the Directory.

Reference Advertising

places wherever people may look for you or your goods, information that will point to you like a signboard.

Your Advertisement

in this book, properly indexed under all headings which describe your business (which is equivalent to repeating the advertisement under each heading) is the greatest value for the money it is possible to get, when the nature and life of the medium is considered.

2.—Because directory advertising is recognized as the most effective and least expensive of any method of reaching all the people all the time.
